# RELEASE NOTES

### for

## BRASS-PIER™
### Version 3.7

### August 2015

## General

The BRASS™ incident tracking system can be found at www.wydot-brass.com. Users without an account on the incident tracking system can request an account by clicking on the "Open a Technical Support Account" link/button and e-mailing the address or calling the phone number listed. A username and password will be created and sent to the user. All BRASS™ technical support questions should be logged in this system.

## Program Maintenance

The following issues were addressed for this release. The incident number is listed in parentheses after each issue if applicable.

### Maintenance

- ➢ Updated the non-dialog-based UI to Visual Studio 2013. (857)
- ➢ Updated the analysis engine to Intel Parallel Studio XE 2015. (458, 866)

### Bug Fixes

- ➢ Replaced all single precision variables with double precision variables, which corrected an error with entering certain axial loads on the LOAD-COMBINED command. (2)
