Wyoming Department of Transportation

RELEASE NOTES

for

BRASS-POLE™
Version 4.4

May 2016

General

The BRASS™ incident tracking system can be found at www.wydot-brass.com. Users without an account for the incident tracking system can request an account by clicking on the "Open a Technical Support Account" link/button and e-mailing the address or calling the phone number listed. A username and password will be created and sent to the user. All BRASS™ technical support questions should be logged in this system.

Program Maintenance

The following issues were addressed for this release. The incident number is listed in parentheses after each issue if applicable.

Bug Fixes

➢ Fixed an error which caused a zero value for arm segment CD values and NAN (not a number) for some of the ratios. (934)

➢ Fixed an error which resulted in plate moments and associated values not being reset after previous analysis runs. (1036)
