GENERAL NOTES

1. Furnish the standard highway monument (concrete) unless the plans allow the use of the alternate monument.

2. Provide tables and/or caps as specified with a mounded top. Preprint the information as shown below for each table or cap. Use approved lettering with a minimum height of 3/16 inch [5] and maximum height of 1/4 inch [8]. Ensure adequate room is available for the surveyor to place a survey mark and other field-annotated information.

ALTARHATE HIGHWAY MONUMENT

Provide alternate monuments only when allowed in the plans. Use a brass or aluminum cap with a mounded top, fasten securely to top of pipe.

Fill alternate monuments with concrete.

Use at least one ferromagnetic insert at the base of monuments for electronic or magnetic detection.

POLYTHYLENE SURVEY MARKER

PLACE POLYTHYLENE SURVEY MARKER 18 IN. [460] RADIUSALLY AND FACING THE ROADWAY AS SHOWN IN THE DIAGRAM.
