NOTES FOR TRAFFIC CONTROL DEVICE (TCD) UNIT SCHEDULE

- (1) See Traffic Control Standard Plans included in project plans for additional information on temporary traffic control devices.
- (2) Portable signs may be mounted on stands, skids, trailers or on WC-4 Barricades at the option of the Contractor unless otherwise specified. However, if portable signs are mounted on WC-4 Barricades, payments will be made for the portable sign installation only. If the engineer specifies a WC-4 Barricade with arrow or other specified signs attached to be placed at a particular location, payment will be made for each installation. Payment will be made for each installation for any subsequent relocation required by the engineer.
- (3) Includes specified signs. Rate is established for a 32' [9.75 m] top width and includes 8' [2.44 m] sideboards. If the top width is increased or decreased by an 8' [2.44 m] increment, the rate for barricades will increase or decrease proportionately, using the WC-4 Barricades rates.
- (4) The rate shown is for Pilot Car with sign, beacon, and driver, and includes overhead and associated costs.
- (5) Use on urban projects only, unless approved otherwise by the Engineer.
- (6) Single sign on single post.
