

Appendix H

Utility Companies

During the life of a project, utilities are nearly always required to be located, marked, and mapped. To initiate the process, “One-Call of Wyoming” is contacted. Once the request has been submitted, a ticket is created with the utility locate information. The ticket will include a list of all utility owners (private companies or municipalities) within the requested area.

To minimize the chance that a utility has not been located, each utility owner should be contacted prior to excavation or mapping. Included in this appendix is a list of the current utilities within the state of Wyoming. The list was compiled from the WYDOT Utility Section database. Along with the name of each utility, all available contact information is included.
