The Honorable Ray LaHood  
Secretary of Transportation  
Department of Transportation  
400 Seventh Street, S.W.  
Room 10200  
Washington, D.C. 20590

Dear Secretary LaHood,

As a natural gas operator in Sublette County, Wyoming, Shell supports the Wyoming Wildlife Corridors TIGER proposal designed to prevent accidents on Hwy. 191 near Pinedale, WY. From what we know about this project, we strongly believe it will increase transportation safety and protect the abundant wildlife in the area.

At Shell, safety is a core value. Saving human lives is an imperative, and in Wyoming protecting our world-class wildlife resources must also be a priority. This project's goals are clearly aligned with our efforts to make safety a daily part of our lives whether it's at work or in the community. They are also consistent with our extensive efforts to mitigate impacts to wildlife and conserve crucial wildlife habitat and migration corridors.

We believe this proposal represents a proven conservation method that will result in safety improvements on our roads for our employees, their families and this community. Coupled with our ongoing wildlife mitigation strategies on the Pinedale Anticline, the project offers a collaborative approach for wildlife preservation that will help ensure that we are able to continue to develop vital energy for the country.

Thank you for considering this proposal. We ask that you fully fund the Wyoming Wildlife Corridor project.

Regards,

Darci Sinclair  
Sr. Communications Specialist, US Rockies
