

Precast and Prestressed Concrete Supplier Qualifications

Prestressed concrete manufacturers are certified by the Precast/Prestressed Concrete Institute (PCI). [PCI's website](#) lists manufacturers and searches for them by product type and region.

Precast concrete manufacturers must be certified on all projects awarded in October 2000 or later. The exact requirements are presented in Subsection 502.4.1 – Plant Certification of Supplemental Specification SS*100B or SSM-100B. Certification will be performed by either the National Precast Concrete Association (NPCA) or the American Concrete Pipe Association (ACPA). These certifications are largely devoted to assuring that certain quality control standards are met. Their addresses are:

National Precast Concrete Association
Rich Krolewski, Director of Regulatory Services
1320 City Center Dr Suite 200
Carmel IN 46268
1-800-366-7731
317-571-9500
Fax 317-571-0041
www.precast.org

American Concrete Pipe Association
James R Tripp, President
222 W Colinas Blvd Suite 641
Irving TX 75039-5423
972-506-7216
Fax 972-506-7682
www.concrete-pipe.org

Note that certifications may lapse and it is the contractor's responsibility to provide WYDOT with current copies of precast suppliers' certification. Also, other suppliers are in the process of becoming certified and may soon become eligible suppliers. The following is a partial list of precast suppliers that are currently certified by either NPCA or ACPA.

Colorado Precast Concrete Inc, Loveland CO
Forterra Pipe & Precast, Billings MT
