The Wyoming Department of Transportation will continue work on the following projects:

### Interstate projects

- **I-80**: Crews will repair six bridges and repave 10 miles of road near Glendo. Crews have been grading, widening and adding an overlay to the road to make it safer. Crews are expected to complete the $11.2 million project on October 2019.
- **I-25**: For the bridge work, crews will make repairs to four of the bridges and replace two of them. The contract completion date is October 2020.
- **I-90**: Crews will continue work on Garner Lake Road between Gillette and the Montana state line. Phase two will consist of realigning 4.8 miles of road, parallel to and to the east of the current road. During phase one, crews extended Garner Lake Road to WYO 59 to provide another northern access into Gillette. The 11 million project has a contract completion date of July 2020.

### Non-Interstate projects

- **Riverton**: The project involves reconstructing two miles of WYO 789 (North Federal Boulevard).
- **Jackson**: Besides reconstructing the road, the contract is a joint project with the city of Riverton that also includes sidewalk and ADA upgrades, utility work, storm sewer work, and new street light and new traffic signal installation. The $13.96 million project has a contract completion date of October 2019.
- **Gillette**: Crews will also continue work on Garner Lake Road and the traveling public, are safe. "When motorists encounter highway work zones, which means they need to plan ahead, allow extra travel time, drive cautiously and avoid distractions. "When motorists encounter highway work zones, they need to follow the reduced speed limits, pay attention to their surroundings and keep a safe distance from other motorists and workers," Carlson said. "We want to ensure everyone, including workers and the traveling public, are safe."

### Spring construction season underway

The Wyoming Department of Transportation will continue with several ongoing projects as well as start new projects in 2019 that will improve road conditions and traffic flow for motorists. Construction crews are expected to start work within the next few weeks, with the majority of the work taking place during the warmer spring, summer and fall months.

The Wyoming Transportation Commission is expected to award about $290 million in contracts by summer and fall months. Construction crews will work on about 97 projects in 2019. "WYDOT will continue work on several projects this construction season that will help preserve and modernize the state's highway system," said Shelby Carlson, WYDOT chief engineer. "We carefully select projects based on system needs and public input. Projects help meet our mission of providing a safe, high quality and efficient transportation system for travelers."

Motorists traveling the state may encounter work zones, which means they need to plan ahead, allow extra travel time, drive cautiously and avoid distractions. "When motorists encounter highway work zones, they need to follow the reduced speed limits, pay attention to their surroundings and keep a safe distance from other motorists and workers," Carlson said. "We want to ensure everyone, including workers and the traveling public, are safe."

WYDOT will be working on two large projects this year on US 26/89/189/191 south of the town of Jackson. This corridor was broken into two separate projects – the Jackson South project and the Snake River South project. The Jackson South project, which included new pavement, additional lanes, turnouts, pathways, accommodations for wildlife and landscaping, as well as various other improvements from mile marker 145-149 will wrap up this year. The work is required to be completed by June 30, 2019.
**Northwest Wyoming - A**

- WYO 390 between Wilson and Tetons National Park: Road resurfacing contract on 8 miles. The contract requires most work to be performed at night to minimize traffic disruptions. October completion.
- US 26-89-189-191 south of Jackson: Widening to five lanes, two bridge replacements, wildlife mitigation, shoulders and addition of pedestrian and bike pathways, mile markers 145-140. June completion
- US 30-310 between Lovell and Cody: Road widening and realignment to accommodate additional lanes as well as bridge repairs on 4 miles of road, 10-foot width with restriction over Shoshone River. October completion.
- WYO 296 Chef Joseph Slide project: Addition of 280,000 cubic yards of material at the bottom of the slide to stabilize area. Guardrail replacement and road repairs. Delays of 5-10 minutes. June completion.
- WYO 789 between Riverton and Shoshone Station: Paving overlay. October completion.
- WY 135 between Riverton and Sweetwater Station: Paving overlay. October completion.
- WYO 132 between US 287 and Ethete: Paving overlay. October completion.

**Southwest Wyoming - B**

- I-80 between Green River and Dunes: Drainage and slope stabilization as part of slide mitigation. October completion.
- US 87 between Rawlins and Cody: Grading, draining and placing and overlay with passing lanes between mile markers 0 - 12. August completion.
- US 189 between Big Piney and Daniel Junction: Resurfacing and bridge rehabilitation on 8 miles of road. Project is funded through 10-cent fuel-tax revenue. October completion.
- WYO 238 between Kemmerer and Hams Fork: 16 miles of grading, milling and paving, as well as other miscellaneous work. October completion.
- WYO 411 west of Mountain View: Road surfacing and bridge rehabilitation on 4 miles of road and three bridges, including right-of-way fence installation. Project is funded through 10-cent fuel-tax revenue. October completion.

**Northeast Wyoming - C**

- WYO 387 from Pine Tree Junction (WYO 56) south southwest toward WYO 102: Mill, level and overlay between mile markers 114 - 132. October completion.
- I-90 Eastbound Buffalo to Gillette: Bridge rehab with mill and overlay. One lane traffic at bridges with reduced speed limits (65, 45) and flaggers between mile markers 185-185.6. June completion.
- US 16 - The Newcastle Marginal – US 16 truck bypass to the Port of Entry and 2nd Avenue to Montgomery Road: Pavement overlay and reconstruction of four-way stop. 10-15 minute delays with flagger traffic control. June completion.
- I-90 Northbound between Ranchester and Montana state line: Pavement scarification and overlay project including bridge rehabilitation and culvert lining. One lane, head to head traffic with reduced speed limits (65, 45) and flagging operations. October completion.

**Southeast Wyoming - D**

- I-90 and I-25 Buffalo Marginal Bridge and ramp rehabilitation project. Scheduled ramps closures with detours beginning mid April with Exit 58 south (EBL). One lane traffic with flaggers and reduced speeds to 45 MPH at bridges. October completion.
- I-90/Ganner Lake Road Overpass: Bridge rehabilitation project, One lane, head to head traffic with reduced speed limits on bridge. Lane shift under bridge on I-90. October completion.
- I-90/Moncove east between mile marker 155-160. Mill and overlay with bridge rehab. One lane, with head to head traffic, flaggers, reduced speed limits (65, 45). October completion.
- WYO 91 near Huntley: Overlay between mile markers 8 - 13.2 (Cold Springs Road). October completion.
- WYO 316 (Antelope Gap Road) near Wheatland: Chip seal between mile markers 5 - 12. August completion.
- WYO 220 between Alcove: Mill, level and overlay with passing lanes between mile markers 86-94. October completion.
