Overall Table of Contents
Phase 1 Table of Contents
Executive Summary

SECTION 1 - Existing Infrastructure	1
1.1 Introduction	2
1.1.1 Methodology	2
1.1.2 Overview	3
1.1.3 Summary of Existing Systems	4
1.1.3.1 Technical	4
1.1.3.2 Functional	4
1.1.3.3 Coverage	5
1.1.3.4 Interoperability	5
1.1.3.5 Operational	6
1.2 State Systems	6
1.2.1 SALECS	7
1.2.2 State Mutual Aid (MA)	8
1.2.3 WYDOT Maintenance	8
1.2.4 Wyoming Highway Patrol (WHP)	9
1.2.5 Wyoming State Forestry Division	9
1.2.6 Summary of Common Characteristics	10
1.2.6.1 Technology	10
1.2.6.2 Equipment Age	10
1.2.6.3 System Interfaces and Frequency Sharing Agreements	10
1.2.6.4 Traffic	11
1.2.7 Backbone Communications (Microwave)	11
<i>Exhibit 1.1 Major State Systems Site Table</i>	13
<i>Exhibit 1.2 Existing Microwave Network</i>	14
<i>Exhibit 1.3 Planned Microwave Systems</i>	15
1.3 Local PSMC Systems	16
1.3.1 Technology	16
1.3.2 Frequency Bands Used	16
1.3.3 Equipment Age	16
1.3.4 Traffic	16
1.3.5 Backbone Communications	17
1.4 Federal Systems	17
1.5 Summary of High Level Characteristics	18
1.5.1 Technical Areas	18
1.5.1.1 Site Locations and Licenses	18
1.5.1.2 Trunking	19
1.5.1.3 Digital vs. Analog Modulation	19
1.5.1.4 Inter-site Communications	19
1.5.1.5 Quality of Service	19

1.5.2 Functional Areas	20
1.5.2.1 Mobile Data Use	20
1.5.2.2 Encryption	20
1.5.3 Coverage Areas	20
1.5.4 Interoperability Matrix and Analysis	20
<i>Exhibit 1.4 Interoperability Matrix for "Routine" Communications</i>	22
<i>Exhibit 1.5 Interoperability Matrix for Existing Communications Problems</i>	23
1.5.5 Operational Issues	24
1.5.5.1 Channel Usage and Traffic	24
1.5.5.2 General Operational Issues	24
1.5.5.3 Cellular Telephone Services	25
1.6 Comparison to Previous Studies	25
1.6.1 Quantum Analysis of Statewide Telecommunications Study (May, 1999)	26
1.6.1.1 Technical Findings	26
1.6.1.2 Functional Findings	26
1.6.1.3 Coverage Findings	26
1.6.1.4 Interoperability Finds	27
1.6.1.5 Operational Findings	27
1.6.2 RSM McGladrey (August, 2000)	27
1.6.2.1 Technical Findings	27
1.6.2.2 Functional Findings	27
1.6.2.3 Coverage Findings	27
1.6.2.4 Interoperability Findings	27
1.6.2.5 Operational Findings	27
1.6.3 Motorola Study (September, 2000)	27
1.6.3.1 Technical Findings	28
1.6.3.2 Functional Findings	28
1.6.3.3 Coverage Findings	28
1.6.3.4 Interoperability Findings	28
1.6.3.5 Operational Findings	28
1.6.4 PSWN Wireless Business Case Strategy (June, 2002)	28
1.6.4.1 Technical Findings	28
1.6.4.2 Functional Findings	28
1.6.4.3 Coverage Findings	28
1.6.4.4 Interoperability Findings	29
1.6.4.5 Operational Findings	29
1.6.4.6 Functional Findings	29
1.6.5 PSWN Wyoming Spectrum Monitoring Report (March, 2003)	29
1.6.5.1 Technical Findings	29
1.6.5.2 Functional Findings	29
1.6.5.3 Coverage Findings	29
1.6.5.4 Interoperability Findings	29
1.6.5.5 Operational Findings	29
1.6.6 Conclusions	30
SECTION 2 - Envisioned Baseline Needs	1
2.1 Executive Summary	2

2.1.1	Introduction	2
2.1.2	Summary of Envisioned Baseline Needs	3
2.1.2.1	Technical	3
2.1.2.2	Functional	3
2.1.2.3	Coverage	3
2.1.2.4	Interoperability	3
2.1.2.5	Operational	4
2.1.3	Overall Quality of Service	4
2.2	Development of Baseline Requirements	4
2.2.1	Technical	4
2.2.1.1	Subscriber Equipment Requirements/Applications	4
2.2.1.2	Frequency Bands	5
2.2.1.3	Infrastructure Equipment Age	6
2.2.1.4	Grounding	6
	<i>Exhibit 2-1 Public Safety Frequency Bands</i>	7
2.2.1.5	Shelter	8
2.2.1.6	Towers	8
2.2.1.7	Power	8
2.2.1.7.1	Generator Backup	8
2.2.1.7.2	Battery Backup/UPS	8
2.2.1.8	Statewide Backbone	9
2.2.2	Functional	9
2.2.2.1	Data Capabilities	9
2.2.2.2	Encryption	9
2.2.3	Coverage	10
2.2.3.1	Mobile Coverage	10
2.2.3.2	Portable Coverage	10
2.2.3.3	Other Coverage Issues	10
2.2.4	Interoperability	11
2.2.4.1	Operational Concept Descriptions	11
	Scenario #1 - Wildfires	12-13
	Scenario #2 - HAZMAT and/or Bio-Terrorism	14-15
	Scenario #3 - Multi-Agency Police Pursuit	16-17
	Scenario #4 - Surveillance/Counter Narcotics	18-19
	Scenario #5 - Hostage Situation	20-21
	Scenario #6 - Air Transportation Disaster	22-23
2.2.4.2	Interoperability Matrix	24
	<i>Exhibit 2.2 Interoperability Communications Matrix - Needs</i>	26
	<i>Exhibit 2.3 Interoperability Communications Matrix - Shortfalls</i>	27
2.2.4.3	Neighboring States	28
2.2.4.3.1	South Dakota	28
2.2.4.3.2	Colorado	28
2.2.4.3.3	Utah	28
2.2.4.3.4	Idaho	29
2.2.4.3.5	Nebraska	29
2.2.4.3.6	Montana	29

2.2.4.4 Past Incidents	29
<i>Exhibit 2.4 PSMC - Interoperability Incident Summary</i>	31-36
2.2.4.5 Interconnect with Existing Systems	37
2.2.4.6 Other Issues	37
2.2.5 Operational	38
2.2.5.1 Backbone Communications	38
2.2.5.2 Access and Security	39
2.2.5.2.1 Perimeter Protection	39
2.2.5.2.2 Building Security	39
2.2.5.2.3 Access Road	39
2.2.5.3 Dispatch Centers	39
2.2.5.4 Traffic and Channel Needs	40
2.2.5.5 Transition Considerations	40
2.2.5.6 System Maintenance	41
2.3 Urgent Need for Stateside Plan	41
2.4 Priority Ranking of Listed Needs	43
2.5 Comparison with Previous Studies	46
2.5.1 Quantum Analysis of Statewide Telecommunications Study (May, 1999)	46
2.5.2 RSM McGladrey (August, 2000)	47
2.5.3 Motorola Study (September, 2000)	47
2.5.4 PSWN Wireless Business Case Strategy (June, 2002)	47
2.5.5 PSWN Wyoming Spectrum Monitoring Report (March, 2003)	47
2.6 Conclusions	47

SECTION 3 - Future Requirements	1
3.1 Executive Summary	2
3.1.1 Introduction	2
3.1.2 Summary of Future Requirements	2
3.1.2.1 Technical Requirements	3
3.1.2.2 Functional Requirements	3
3.1.2.3 Coverage Requirements	3
3.1.2.4 Interoperability Requirements	3
3.1.2.5 Operational Requirements	3
3.2 Technical Requirements Detail	4
3.2.1 Project 25 Compliance	4
3.2.2 IP (Internet Protocol) Based Radios	4
3.2.3 Software Defined Radios	4
3.2.4 Flexibility	4
3.3 Functional Requirements Detail	5
3.3.1 Low-Speed Data	5
3.3.2 High-Speed Data	6
3.3.3 Encryption	6
3.3.4 Enhanced Security Features	7
3.3.5 Future Enhanced Features	7
<i>Exhibit 3.1 - Ranking of Enhanced Features</i>	8
3.4 Coverage Requirements Detail	8
3.5 Interoperability Requirements Detail	8
3.5.1 Additional Interoperability Requirements	9
3.6 Operational Requirements Detail	9
3.6.1 Currently Funded Improvements/Growth	10
3.6.2 Additional Growth	11
3.6.3 Maintenance	12
3.6.4 Network Control and Operation	13
3.6.5 Consolidation	13
3.6.6 Transition and Implementation Schedule	14
3.7 Validation and Prioritization Process	14
3.7.1 Validation and Prioritization Methodology	15
<i>Exhibit 3.2 - Features and Upgrades</i>	16
<i>Exhibit 3.3 - Summary of Requirements</i>	19
3.8 Future Network Requirements	20
3.8.1 High Availability	20
3.8.2 Feature Rich Environment	20
3.8.3 Survivability	20
3.8.4 Expandability	20
3.8.5 Infrastructure	20
3.8.6 Interoperability	21
3.9 Comparison with Prior Studies	21

3.9.1 Quantum Analysis of Statewide Telecommunications Study (May, 1999)	21
3.9.1.1 Technical Findings	21
3.9.1.2 Functional Findings	21
3.9.1.3 Coverage Findings	22
3.9.1.4 Interoperability Findings	22
3.9.1.5 Operational Findings	22
3.9.2 RSM McGladrey (August, 2000)	22
3.9.2.1 Technical Findings	22
3.9.2.2 Functional Findings	22
3.9.2.3 Coverage Findings	22
3.9.2.4 Interoperability Findings	22
3.9.2.5 Operational Findings	22
3.9.3 Motorola Study (September, 2000)	23
3.9.3.1 Technical Findings	23
3.9.3.2 Functional Findings	23
3.9.3.3 Coverage Findings	23
3.9.3.4 Interoperability Findings	23
3.9.3.5 Operational Findings	23
3.9.4 PSWN Wireless Business Case Strategy (June, 2002)	23
3.9.4.1 Technical Findings	24
3.9.4.2 Functional Findings	24
3.9.4.3 Coverage Findings	24
3.9.4.4 Interoperability Findings	24
3.9.4.5 Operational Findings	24
3.9.5 Conclusions	24

SECTION 4 - Baseline Requirements and Performance Standards	1
4.1 Introduction	2
4.1.1 Baseline Requirements Methodology	2
4.1.2 Performance Standards Methodology	3
4.2 Prioritized Requirements	3
<i>Table 4.1 - Prioritization of Baseline Requirements</i>	4
4.3 Requirements Details and Additional Areas	5
4.3.1 Technical Requirements	5
4.3.2 Functional Requirements	5
4.3.3 Coverage Requirements	6
4.3.4 Interoperability Requirements	6
4.4 Performance Standards	6
4.4.1 Technology-based Performance Standards	7
4.4.1.1 Radio Equipment	7
4.4.1.2 Controllers	7
4.4.1.3 Long Haul Communications Equipment	8
4.4.1.4 Interfaces To Existing Equipment	8
4.4.2 Support Processes and Design	8
4.4.2.1 System Maintenance	8
4.4.2.2 Testing and Measurement	9
4.4.2.3 Scheduling	9
4.4.2.4 Adding New Users and Changing Databases	9
4.4.3 Overall System Parameters	10
4.4.3.1 System Availability	10
4.4.3.1.1 RF System Availability	10
4.4.3.1.2 Long Haul Communications Equipment Reliability	11
4.4.3.1.3 Communications Site Environmental Systems	11
4.4.3.2 Radio Coverage Percentage	11
4.4.3.2.1 Mobile and Portable Radio Coverage	11
4.4.3.2.2 Other Coverage	12
4.4.3.3 Voice Quality - Delivered Audio Quality (DAQ)	12
<i>Exhibit 4.1 - Signal Quality Measurements</i>	13
4.5 Acceptance Test Procedures	14
4.5.1 General Acceptance Test Principles	14
4.5.2 Factory Integration (Staging) Test and Pre-Ship Acceptance	15
4.5.3 Shelter and Site Testing/Inspection	15
4.5.4 Field Functionality Testing	16
4.5.4.1 Backbone Tests	16
4.5.4.2 LMR Testing	17
4.5.4.3 Radio System Feature Testing	17
4.5.4.4 Tone Testing	17
4.5.4.5 Trunking System Features	17
4.5.4.6 Dispatch Features	18
4.5.5 Failure Mode Testing	19

4.5.5.1 System Failure Priority Level Determination	19
4.5.5.2 Failure Mode Definition	20
4.5.6 Physical Configuration Audit	20
4.5.6.1 Physical Configuration Audit Documentation Requirements	20
4.5.6.2 Physical Configuration Audit Inventory Requirements	21
4.5.7 Coverage Testing	21
4.5.7.1 Responsibilities	21
4.5.7.2 Coverage Test Plans	22
4.5.7.3 Coverage Testing Modes	22
4.5.7.3.1 Bit-Error-Rate Testing	23
4.5.7.3.2 Testing in Less-than-Full-Foliated Conditions	23
4.5.7.3.3 Re-testing Methodology	24
4.5.7.3.4 Portable Service Area Testing	24
4.5.7.3.5 Data Coverage Test Plan	24
4.5.8 Interoperability Testing and Measures	24
4.5.8.1 Subscriber Static Functionality	25
4.5.8.2 Mobility Management	25
4.5.8.3 Inter-Working with Legacy Systems	25
4.5.9 Operational Testing by Users	25
4.5.10 Regional/Statewide Acceptance	25
4.6 Conclusions	25
<i>Exhibit 4.2 - Typical Portable Radio Performance Standards</i>	26
<i>Exhibit 4.3 - Typical Mobile Radio Performance Standards</i>	27-28
<i>Exhibit 4.4 - General Performance Specifications</i>	29
<i>Exhibit 4.5 - List of Applicable Standards and Regulations</i>	30-32

- APPENDIX A - Desired Features**
- APPENDIX B - Group and Agency Interviews**
- APPENDIX C - Site Visits**
- APPENDIX D - FCC Database of Public Safety Radio Sites**
- APPENDIX E - Letter from Governor Jim Geringer
Survey for the State of Wyoming Public Safety
Mobile Communications Planning Project
Wyoming Radio Survey
FEClientNet Survey Summary**
- APPENDIX F - Wyoming Radio Coverage Analysis**
- APPENDIX G - Existing Site Locations**
- APPENDIX H - Past Studies and Reports**
- APPENDIX I - Analysis of PSMC Efforts in Neighboring States**
- APPENDIX J - Glossary of Terms and Abbreviations (included in Phase 1 & 2)**
- APPENDIX K - Prioritizing Needs Form**

Traceability Matrix
