

# RELEASE NOTES

for

## BRASS-DIST<sup>TM</sup>

Version 2.4

November 2021

---

### General

The BRASS<sup>TM</sup> Incident Tracking System can be found at <https://www.wydot-brass.com>. Users without an account for the incident tracking system can request an account by clicking on the "Open a New Account" link/button and e-mailing the address or calling the phone number listed. A username and password will be created and sent to the user. All BRASS<sup>TM</sup> technical support questions should be logged in this system.

### Program Maintenance

The following issues were addressed for this release. The incident number is listed in parentheses after each issue if applicable.

#### Maintenance

- Updated the analysis engine to Intel Fortran Compiler 2021. (1486, 1757, 1915)
- Updated the GUI to validate the existence of necessary executable files upon opening the GUI. (1499)
- Updated the GUI to reference the .NET Framework 4.7.2. (1555)
- Updated the installation with respect to the Start Menu format to create an individual menu for this application. Windows 10 is only a one-tier menu system, so using an overall BRASS menu to house submenus for all the BRASS applications could no longer be done. (1577)
- Migrated the help system from the .doc-based RoboHelp 8 help to a .htm-based RoboHelp 2019. The resulting help system is still a .chm file. (1596)
- Updated the GUI to Microsoft Visual C++ 2019. (1745)
- Updated the application to provide 64-bit executables and DLLs. (1872, 1887)
- Corrected formatting inconsistencies in the Help system. (2000)
